## GOLAN PRODUCTS

Golan Products present to you our USA made, high performance, second generation and "NEW TECHNOLOGY" petcock.

Our petcock is made out of show chrome plated 360 brass, and stainless steel ball bearing and components.

Our Ball Bearing mechanism prevents frozen valve, providing a secure seal in "OFF" position, and our O-Ring seat secures any leak from Petcock to carburetor, and gives you the feeling of rigid and positive action.

This new petcock can easily be modified for use in low and shallow tanks, without any problem, petcock can be mounted in the very end of tank or any other desired location on the tank.

Large distance in positioning between "ON" and "RESERVE" (180 Degree, stop to stop) for safe operation.

Positioning handle has firm movement to prevent accidental shifting from vibration, also, this petcock is easily rebuildable.

Our Petcocks carry a limited lifetime warranty. Available in 22mm.

### A. PETCOCKS

- 21-330 Peak Flow petcock with side outlet. SOLD EACH
- 21-331 Peak Flow petcock for XL models.
- 21-332 Peak Flow petcock with forward facing outlet.
- 21-333 Peak Flow petcock with backward facing outlet.

### B. COMPACT FUEL FILTERS

This is the best insurance you can buy to keep fuel contamination from reaching that expensive motor. These **U.S.A. MADE** compact fuel filters have a total of 4 square inches of effective aerospace quality 10 micron 304 stainless steel filtration area. The CNC aluminum filter bodies are show chrome plated.

- 21-334 Super Mini filter with 5/16" barb. SOLD EACH  
Indefinitely reusable. Filter body is .875" long.
- 21-335 Mini Filter with 5/16" barb. Maximum fuel flow with no restriction.

### C. HIGH FLOW CUSTOM PETCOCKS

Chrome plated custom petcocks fit 1975 & later. 3/8" spigot outlet; 13/16" nut.

- 21-370 Round body, outlet facing right. SOLD EACH
- 21-371 Round body, outlet facing down.
- 21-372 Round body, outlet facing rear.
- 21-137 Hex body, side down outlet.
- 21-138 Hex body, rear outlet.
- 21-158 Hex body, front outlet.

### D. ACCEL HIGH FLOW FUEL VALVE KITS

Accel's chrome plated high flow fuel valve includes a pre-filtering screen and reserve with an easy-to-grip lever. The valve body is engineered to prevent leakage, yet delivers maximum fuel flow for high performance applications. The kit comes complete with a chrome plated adapter nut and teflon sealing sleeve, allowing the valve to fit any stock H-D® tank with a 22mm bung. Instructions are included.

- 21-212 Accel high flow fuel valve kit with SOLD EACH  
straight 5/16" hose barb.
- 21-246 Same as above part No. 21-212 except with 90°  
spigot and 180° swivel for right, left and rear applications.
